

FINACCRUAL

Testing & Defect Documentation

Document Control

Document title	FinAccrual – Testing & Defect Documentation
Source workbook	FinAccrual Bug Sheet and Test Case Sheet.xlsx
Source worksheets	TEST CASE SHEET; BUG SHEET
Purpose	Consolidate the supplied test scenarios, expected and actual outcomes, and recorded defects into a readable document.
Data handling	Source entries are retained in substance. Missing or blank fields are identified as not specified; no unrecorded resolution or test outcome is assumed.

Table of Contents

1. 1. Executive Summary
2. 2. Purpose and Scope
3. 3. Testing Approach and Status Definitions
4. 4. Test Execution Summary
5. 5. Functional Coverage Overview
6. 6. Detailed Test Case Register
7. 7. Defect Register
8. 8. Observations and Follow-up Considerations
9. 9. Source Data Notes

1. Executive Summary

This document consolidates 182 test-case records and 27 non-empty defect-sheet records from the supplied workbook. The test cases cover the FinAccrual Excel Add-in and related workflows, including application launch, provider selection, company management, journal types, master-data setup and import, account/profile/settings, subscriptions, notifications, and Xero connectivity.

The source workbook contains a mixture of completed, failed, pending, and partially populated test records. The status summary below reflects only values explicitly entered in the source sheet; blank statuses are not treated as passes or failures.

Recorded test status	Number of cases
Passed	136
Not specified in source sheet	21
Failed	25
Total test cases	182

2. Purpose and Scope

Purpose: provide a consolidated reference for QA, development, project coordination, and review by presenting the test case intent, test data or scope, expected behavior, observed behavior, execution status, priority, type, and linked defect where recorded.

In scope: all populated test-case entries in the TEST CASE SHEET and all populated issue entries in the BUG SHEET. The documentation does not independently validate the application; it reports the supplied workbook.

3. Testing Approach and Status Definitions

Functional testing: Checks whether user actions and workflows behave as expected, such as connecting providers, importing data, or managing companies.

UI testing: Checks visibility, layout, labels, and user-interface behavior.

Negative testing: Checks validation and behavior when inputs or conditions are invalid or incomplete.

Pass: The source sheet records the test as passed. This reflects the recorded test outcome, not an independent retest.

Fail: The source sheet records behavior that differs from the expected result.

Pending: The source sheet indicates that the issue or test remains pending.

Blank / unspecified: The source does not provide a status or field value.

4. Test Execution Summary

The following counts are derived from the Status column as entered. Variations in capitalization (for example, Pass and PASS) are grouped together.

- Passed: 136
- Not specified in source sheet: 21
- Failed: 25

Total test cases identified: 182.

5. Functional Coverage Overview

Workbook section	Test cases
General	10
Journal Type	5
QuickBooks Connection	13
Pull Master Data	5
Master Data validation	7
UI Validation	9
Login Module	30
Dashboard	10

Edit button	8
Delete Button	23
Profile	3
Manage account	11
Settings	2
Plan Details	5
Notifications	15
Xero	26

Coverage labels follow the section dividers present in the spreadsheet. Where a test case appears before a section divider, it is grouped under General.

6. Detailed Test Case Register

Each test case below is transcribed from the source worksheet. Fields absent from the spreadsheet are marked accordingly.

TC-001 — Launch Excel Add-in

Workbook section	General
Test data / scope	Open Excel and load FinAccrual Add-in
Expected result	Add-in loads successfully without errors
Actual result	Add-in loads successfully without errors
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-002 — Open multiple Excel files

Workbook section	General
Test data / scope	1. Open two Excel workbooks. 2. Load the FinAccrual Add-in in both workbooks. 3. Verify functionality in both windows.
Expected result	Add-in works correctly in each supported workbook
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet

Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-003 — Close and reopen Excel

Workbook section	General
Test data / scope	1. Open Excel and connect the add-in. 2. Close Excel. 3. Reopen Excel and load the add-in.
Expected result	Add-in loads normally
Actual result	Add-in loads successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-004 — Open unsupported Excel version

Workbook section	General
Test data / scope	1. Install or open an unsupported version of Microsoft Excel. 2. Load the FinAccrual Add-in. 3. Observe the application behavior
Expected result	User receives a compatibility message if unsupported
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-005 — Check side panel

Workbook section	General
Test data / scope	1. Open Microsoft Excel. 2. Click the FinAccrual button. 3. Observe the side panel.
Expected result	Side Panel open correctly and all controls are visible
Actual result	Side Panel open correctly and all controls are visible

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-006 — Resize panel

Workbook section	General
Test data / scope	1. Open the FinAccrual side panel. 2. Resize the Excel window or task pane. 3. Observe the UI layout
Expected result	UI should be adjusts properly
Actual result	UI adjusts properly

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-007 — Select QuickBooks

Workbook section	General
Test data / scope	1. Open the Provider dropdown. 2. Select QuickBooks. 3. Observe the selected provider
Expected result	QuickBooks becomes the active provider, and QuickBooks-related options are displayed
Actual result	QuickBooks become active
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-008 — Select Xero

Workbook section	General
Test data / scope	1. Open the Provider dropdown. 2. Select Xero. 3. Observe the selected provider
Expected result	Xero becomes the active provider, and

	Xero-related options are displayed
Actual result	Xero activated
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-009 — Switch providers repeatedly

Workbook section	General
Test data / scope	1. Select QuickBooks. 2. Switch to Xero. 3. Repeat the process multiple times. 4. Observe the application behavior
Expected result	The provider switches successfully every time without UI issues, crashes, or data corruption
Actual result	No UI crashes
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-010 — Default provider

Workbook section	General
Test data / scope	1. Launch Microsoft Excel. 2. Open the FinAccrual Add-in. 3. Observe the default provider selection
Expected result	QuickBooks is selected as the default provider
Actual result	QuickBook selected by default
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-011 — Select Accrual

Workbook section	Journal Type
-------------------------	---------------------

Test data / scope	1. Open the FinAccrual Add-in. 2. Navigate to the Journal Type section. 3. Click Accrual
Expected result	Accrual is selected and visually highlighted. Only the Accrual option remains active
Actual result	Accrual is selected
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-012 — Select Prepaid

Workbook section	Journal Type
Test data / scope	1. Open the Journal Type section. 2. Click Prepaid
Expected result	Prepaid is selected and visually highlighted. Only the Prepaid option remains active
Actual result	Prepaid is selected
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-013 — Select Deferred Revenue

Workbook section	Journal Type
Test data / scope	1. Open the Journal Type section. 2. Click Deferred Revenue
Expected result	Deferred Revenue is selected and visually highlighted. Only the Deferred Revenue option remains active
Actual result	Deferred revenue is selected
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-014 — Switch journal types

Workbook section	Journal Type
Test data / scope	1. Select Accrual. 2. Select Prepaid. 3. Select Deferred Revenue. 4. Repeat the switching process multiple times
Expected result	Only one journal type remains selected at any time. The application does not crash or display incorrect selections
Actual result	Only option selected
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-015 — Change journal after setup

Workbook section	Journal Type
Test data / scope	1. Connect to QuickBooks. 2. Click Setup Master & Input Sheets. 3. Change the selected journal type. 4. Observe the application behavior
Expected result	The application displays the appropriate behavior according to the requirement
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-016 — Connect button visible

Workbook section	QuickBooks Connection
Test data / scope	1. Open Microsoft Excel. 2. Click the FinAccrual ribbon. 3. Observe the side panel
Expected result	The Connect QuickBooks button is visible, enabled, and ready to use
Actual result	Connect QuickButton is visible
Recorded status	Passed
Linked bug ID	Not specified in source sheet

Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-017 — Click on Connect QuickBooks

Workbook section	QuickBooks Connection
Test data / scope	1. Open the FinAccrual Add-in. 2. Click Connect QuickBooks. 3. Observe the login window
Expected result	Intuit login page should be displayed
Actual result	Intuit login page opens
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-018 — Login using valid credentials

Workbook section	QuickBooks Connection
Test data / scope	1. Click Connect QuickBooks. 2. Enter valid QuickBooks Sandbox credentials. 3. Click Sign In
Expected result	Login is successful. The popup closes, and the application connects to the selected QuickBooks
Actual result	Login successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-019 — Login using invalid Email

Workbook section	QuickBooks Connection
Test data / scope	1. Click Connect QuickBooks. 2. Enter an invalid email address. 3. Enter a valid password. 4. Click Sign In
Expected result	An appropriate authentication error message is displayed, and the user

	remains disconnected
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-020 — Login using invalid password

Workbook section	QuickBooks Connection
Test data / scope	1. Click Connect QuickBooks. 2. Enter a valid email address. 3. Enter an incorrect password. 4. Click Sign In
Expected result	An appropriate authentication error message is displayed, and the user remains disconnected
Actual result	Showing an proper error message
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-021 — Cancel login

Workbook section	QuickBooks Connection
Test data / scope	1. Click Connect QuickBooks. 2. When the Intuit login page opens, close the login window or click Cancel. 3. Return to the add-in
Expected result	The login process is cancelled, the user remains Disconnected, and no connection is established
Actual result	User remains disconnected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-022 — Check Connected status

Workbook section	QuickBooks Connection
Test data / scope	1. Connect successfully using valid credentials. 2. Return to the FinAccrual side panel. 3. Observe the connection status
Expected result	The connection status changes to Connected, indicating a successful QuickBooks connection
Actual result	Status change to Connected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-023 — Check Company ID

Workbook section	QuickBooks Connection
Test data / scope	1. Connect successfully to QuickBooks. 2. Observe the Company ID (Realm ID) section in the side panel
Expected result	The Company ID should be displayed correctly and matches the connected QuickBooks
Actual result	The Company ID is displayed correctly and matches the connected QuickBooks
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-024 — Setup sheets

Workbook section	QuickBooks Connection
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Setup Master & Input Sheets
Expected result	The required worksheets should be created
Actual result	The required worksheets are created successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet

Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-025 — Setup without login

Workbook section	QuickBooks Connection
Test data / scope	1. Open the FinAccrual Add-in. 2. Do not connect to QuickBooks. 3. Click Setup Master & Input Sheets
Expected result	An appropriate error or validation message should be displayed
Actual result	The Buttons are not visible
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-026 — Check Master_Data sheet

Workbook section	QuickBooks Connection
Test data / scope	1. Connect to QuickBooks. 2. Click Setup Master & Input Sheets. 3. Open the workbook and verify the sheet tabs
Expected result	The Master_Data worksheet should be created and displayed in the workbook
Actual result	The Master_Data worksheet should be created and displayed in the workbook
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-027 — Check input sheet

Workbook section	QuickBooks Connection
Test data / scope	1. Connect to QuickBooks. 2. Click Setup Master & Input Sheets. 3. Open the workbook and verify the sheet tabs
Expected result	The Input worksheet should be created

Actual result	The Input worksheet is created and displayed in the workbook
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-028 — Check Master_Data headers

Workbook section	QuickBooks Connection
Test data / scope	1. Connect to QuickBooks. 2. Click Setup Master & Input Sheets. 3. Open the Master_Data worksheet. 4. Verify the header row
Expected result	All required column headers should be displayed correctly according to the application specification
Actual result	All required column headers are displayed correctly according to the application specification
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-029 — Pull data

Workbook section	Pull Master Data
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data.
Expected result	Master data should be imported successfully into the Master_Data worksheet
Actual result	Master data is imported successfully into the Master_Data worksheet
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-030 — Pull the data without SetUp Master & Input sheets

Workbook section	Pull Master Data
Test data / scope	1. Open the FinAccrual Add-in. 2. Do not connect to QuickBooks. 3. Click Pull Master Data
Expected result	User friendly error message should be displayed
Actual result	Error message is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-031 — Pull Master Data multiple times

Workbook section	Pull Master Data
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. After completion, click Pull Master Data again. 4. Compare the imported data
Expected result	Data should be refreshed successfully, and no duplicate records are created in the Master Data worksheet
Actual result	Data is refreshed and no duplicate data are created
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-032 — Large dataset

Workbook section	Pull Master Data
Test data / scope	1. Connect to a QuickBooks company containing 1000+ records. 2. Click Pull Master Data
Expected result	All records should be imported successfully without application crashes, data loss, or performance issues
Actual result	Not specified in source sheet

Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-033 — Network lost during Pull Master Data

Workbook section	Pull Master Data
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Disconnect the internet while the synchronization is in progress. 4. Observe the application behavior
Expected result	A user-friendly network error message should be displayed
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-034 — Client ID

Workbook section	Master Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Check the Client ID column
Expected result	All Client IDs are populated correctly and match the corresponding records in QuickBooks
Actual result	All Client IDs are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-035 — Client Name

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks.

	2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Verify the Client Name column
Expected result	All Client Names are populated correctly and match the corresponding records in QuickBooks
Actual result	All Client Name are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-036 — Account ID

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Verify the Account ID column
Expected result	All Account IDs are populated correctly, are unique, and match the corresponding records in QuickBooks
Actual result	All Account IDs are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-037 — Account code

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Verify the Account Code column
Expected result	All Account Codes are populated correctly and match the corresponding records in QuickBooks
Actual result	All Account code are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet

Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-038 — Account Type

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Verify the Account Type column
Expected result	All Account Types are populated correctly and match the account types in the QuickBooks source system
Actual result	All Account type are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-039 — Account Sub-Type

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data. 3. Open the Master_Data worksheet. 4. Verify the Account Sub-Type column
Expected result	All Account Sub-Types are populated correctly
Actual result	All Account sub type are populated correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-040 — Duplicate records

Workbook section	Master_Data validation
Test data / scope	1. Connect successfully to QuickBooks. 2. Click Pull Master Data.

	3. Run Pull Master Data again. 4. Compare the records in the Master Data worksheet
Expected result	No duplicate records are created after multiple data pulls. Existing records are updated or refreshed as per the application design
Actual result	No duplicate records are created
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-041 — Button alignment

Workbook section	UI Validation
Test data / scope	1. Open Microsoft Excel. 2. Launch the FinAccrual Add-in. 3. Observe all buttons in the side panel
Expected result	All buttons should be properly aligned, evenly spaced, and displayed without overlap or misalignment
Actual result	All buttons is properly aligned, evenly spaced, and displayed without overlap or misalignment
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-042 — Font consistency

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual Add-in. 2. Navigate through all sections of the side panel. 3. Observe the font style and size
Expected result	Font style, size, and formatting are consistent throughout the application
Actual result	Font style, size, and formatting are consistent throughout the application

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-043 — Button colors

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual Add-in. 2. Observe all action buttons (e.g., Connect, Setup, Pull Master Data)
Expected result	All button colors match the approved UI/design specification and clearly indicate their state (enabled, disabled, active)
Actual result	All button colors match the approved UI/design specification and clearly indicate their state (enabled, disabled, active)
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-044 — Responsive layout

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual Add-in. 2. Resize the Excel window or task pane. 3. Observe the layout of the controls
Expected result	The layout adjusts correctly without overlapping controls, hidden content, or broken UI elements
Actual result	The layout adjusts correctly without overlapping controls, hidden content, or broken UI elements
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-045 — Scroll behavior

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual side panel. 2. Scroll from the top to the bottom of the panel. 3. Observe the scrolling behavior
Expected result	Scrolling should be smooth, and all controls remain accessible without UI glitches or freezing
Actual result	Scrolling should be smooth, and all controls remain accessible without UI glitches or freezing
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-046 — Text overflow

Workbook section	UI Validation
Test data / scope	1. Connect to a QuickBooks company with a long company name or long account names. 2. Observe the displayed text in the side panel and workbook
Expected result	Long text should be displayed correctly without overlapping or layout issues
Actual result	Long text should be displayed correctly without overlapping or layout issues
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-047 — Login Screen Not Displayed After Reconnecting

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual Add-in. 2. Connect and log in successfully. 3. Click Disconnect. 4. Click Connect again
Expected result	After clicking Disconnect, the current

	user session should be cleared. When the user clicks Connect again, the login page should be displayed
Actual result	After clicking Disconnect and then Connect, the application reconnects directly without displaying the login page
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-048 — Login Page Is Not Displayed After Reconnecting to Xero

Workbook section	UI Validation
Test data / scope	1. Open the FinAccrual Add-in. 2. Connect to Xero and log in successfully. 3. Click Disconnect. 4. Click Connect Xero again. 5. Observe the page displayed
Expected result	After disconnecting, clicking Connect Xero should redirect the user to the Xero Login page
Actual result	After disconnecting, clicking Connect Xero opens the Xero User Consent (Authorization) page directly instead of displaying the Login page
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-049 — Pull Master Data shows QuickBooks Data After Automatic Disconnection

Workbook section	UI Validation
Test data / scope	1. Connect to QuickBooks successfully. 2. Do not manually disconnect QuickBooks. 3. Change the provider and connect to

	Xero. 4. Verify that QuickBooks is automatically disconnected. 5. Click Pull Master Data. 6. Observe the result
Expected result	The pull data should not displayed
Actual result	Even after QuickBooks is automatically disconnected, still shows QuickBooks data
Recorded status	Failed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-001 — Check application loads data automatically on launch

Workbook section	Login Module
Test data / scope	Launch the application with a valid internet connection
Expected result	The application should automatically load and display the latest data when it opens without requiring a manual refres
Actual result	Data is not displayed when the application opens. The data appears only after manually refreshing the application
Recorded status	Failed
Linked bug ID	TC-001
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-002 — Check application logo

Workbook section	Login Module
Test data / scope	Launch login page
Expected result	Logo should be visible and dsiapected correctly
Actual result	Logo is visible and dsiapected correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet

Priority	Medium
Type	UI

TC-003 — Check application title

Workbook section	Login Module
Test data / scope	Launch login page
Expected result	"FinAccrual" title should be displayed correctly
Actual result	"FinAccrual" title is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-004 — Check Google Sign-In button visibility

Workbook section	Login Module
Test data / scope	NA
Expected result	"Continue with Google" button should be visible and enabled
Actual result	"Continue with Google" button is visible and enabled
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	UI

TC-005 — Microsoft Sign-In button visibility

Workbook section	Login Module
Test data / scope	NA
Expected result	"Continue with Microsoft" button should be visible and enabled
Actual result	"Continue with Microsoft" button is visible and enabled
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	UI

TC-006 — Check Google Sign-In functionality

Workbook section	Login Module
Test data / scope	Valid Google account
Expected result	Google authentication page should be displayed
Actual result	Google authentication page opens successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-007 — Check successful Google login

Workbook section	Login Module
Test data / scope	Not specified in source sheet
Expected result	Not specified in source sheet
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Negative

TC-008 — Check Microsoft Sign-In functionality

Workbook section	Login Module
Test data / scope	Valid Microsoft account
Expected result	Microsoft authentication page should be displayed
Actual result	Microsoft authentication page opens successfully
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-009 — Check successful Microsoft login

Workbook section	Login Module
Test data / scope	Not specified in source sheet
Expected result	Not specified in source sheet

Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Negative

TC-010 — Check invalid Google login

Workbook section	Login Module
Test data / scope	Invalid credentials
Expected result	Error message is displayed and login is not completed
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Negative

TC-011 — Check invalid Microsoft login

Workbook section	Login Module
Test data / scope	Invalid credentials
Expected result	Error message is displayed and login is not completed
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Negative

TC-012 — Check user cancels Google login

Workbook section	Login Module
Test data / scope	Cancel
Expected result	User returns to login screen without logging in
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Negative

TC-013 — Check user cancels Microsoft login

Workbook section	Login Module
Test data / scope	NA
Expected result	User returns to login screen without logging in
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-014 — Check multiple clicks on Google button

Workbook section	Login Module
Test data / scope	Rapidly click Google button
Expected result	Only one authentication request should be initiated
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-015 — Check responsive UI

Workbook section	Login Module
Test data / scope	Resize Excel task pane
Expected result	All controls remain visible and should be properly aligned
Actual result	All controls remain visible and properly aligned
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-016 — Check the Google login window opens properly

Workbook section	Login Module
Test data / scope	Click Continue with Google
Expected result	After clicking Continue with Google,

	the Google sign-in window should open immediately and be visible to the user
Actual result	The Google sign-in window opens behind the application, so the user cannot see it immediately
Recorded status	Failed
Linked bug ID	TC-002
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI / Usability

TC-017 — Check the microsoft login window opens properly

Workbook section	Login Module
Test data / scope	Click Continue with Microsoft
Expected result	After clicking Continue with Microsoft, the Microsoft sign-in window should open immediately and be visible to the user
Actual result	The Microsoft sign-in window opens behind the application, so the user cannot see it immediately
Recorded status	Failed
Linked bug ID	TC-002
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI / Usability

TC-018 — Check Home page loads successfully

Workbook section	Login Module
Test data / scope	Launch add-in after login
Expected result	Home dashboard should be visible
Actual result	Home dashboard is visible
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-019 — Check Subscription ID is displayed

Workbook section	Login Module
Test data / scope	Active subscription
Expected result	Correct Subscription ID should be

	displayed
Actual result	Correct Subscription ID is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-020 — Subscription ID copy functionality

Workbook section	Login Module
Test data / scope	Click the Copy icon next to the Subscription ID
Expected result	The Subscription ID should be copied to the clipboard successfully, and the user should be able to paste the copied value correctly
Actual result	Subscription ID was copied successfully and pasted correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-021 — Check Plan name

Workbook section	Login Module
Test data / scope	Active subscription
Expected result	Correct plan (Basic Plan/Premium Plan) should be displayed
Actual result	Correct plan (Basic Plan/Premium Plan) is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-022 — Plan Name

Workbook section	Login Module
Test data / scope	Logged-in user with an active subscription
Expected result	The correct subscription plan name

	(e.g., Basic Plan) should be displayed
Actual result	The correct plan name (Basic Plan) is displayed successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-023 — Check account status

Workbook section	Login Module
Test data / scope	Logged-in user with an active subscription
Expected result	Logged-in user with an active subscription
Actual result	The account status is displayed as Active
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-024 — QuickBooks card UI

Workbook section	Login Module
Test data / scope	NA
Expected result	QuickBooks logo, description and button should be displayed correctly
Actual result	QuickBooks logo, description and button are displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-025 — Xero card UI

Workbook section	Login Module
Test data / scope	NA
Expected result	Xero logo, description and button should be displayed correctly

Actual result	Xero logo, description and button are displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-026 — Click Connect QuickBooks button

Workbook section	Login Module
Test data / scope	Click Connect QuickBooks
Expected result	Intuit login page should be displayed
Actual result	Intuit login page is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-027 — Login using valid credentials

Workbook section	Login Module
Test data / scope	Email:***** Password:*****
Expected result	Login is successful. The popup closes, and the application connects to the selected QuickBooks
Actual result	Login successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-028 — Login using invalid Email

Workbook section	Login Module
Test data / scope	Email:***** Password:*****
Expected result	An appropriate authentication error message is displayed, and the user remains disconnected
Actual result	Showing an proper error message
Recorded status	Passed

Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-029 — Login using invalid password

Workbook section	Login Module
Test data / scope	Email:***** Password:*****
Expected result	An appropriate authentication error message is displayed, and the user remains disconnected
Actual result	Showing an proper error message
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-030 — Cancel login

Workbook section	Login Module
Test data / scope	NA
Expected result	The login process is cancelled, the user remains Disconnected, and no connection is established
Actual result	User remains disconnected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-031 — Check dashboard loads successfully

Workbook section	Dashboard
Test data / scope	Connected QuickBooks account
Expected result	Dashboard loads without errors
Actual result	Dashboard loads without errors
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-032 — Check Connected status

Workbook section	Dashboard
Test data / scope	NA
Expected result	The connection status changes to Connected, indicating a successful QuickBooks connection
Actual result	Status change to Connected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-033 — Check Company ID

Workbook section	Dashboard
Test data / scope	*****
Expected result	The Company ID should be displayed correctly and matches the connected QuickBooks
Actual result	The Company ID is displayed correctly and matches the connected QuickBooks
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-034 — Check Connected Company Name

Workbook section	Dashboard
Test data / scope	Connected account
Expected result	Correct company name should be displayed
Actual result	Correct company name is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-035 — Last Sync information

Workbook section	Dashboard
Test data / scope	Connected account
Expected result	The latest sync time should always be displayed correctly after each successful sync
Actual result	The Last Sync information is displayed correctly only sometimes
Recorded status	Failed
Linked bug ID	TC-003
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-036 — Check Active badge

Workbook section	Dashboard
Test data / scope	Active company
Expected result	Company status should be displays Active
Actual result	Company status displays Active
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-037 — Add Another Company with Basic Plan

Workbook section	Dashboard
Test data / scope	User has a Basic Plan with one company already connected
Expected result	When the user clicks Add Another Company, the system should display a "Connection Limit Reached" message
Actual result	The application displays the "Connection Limit Reached" message and prevents connecting another company
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-038 — Check three-dot menu visibility

Workbook section	Dashboard
Test data / scope	Connected company
Expected result	Three-dot menu should be visible beside the company
Actual result	Three-dot menu is visible beside the company
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-039 — clicking the three-dot menu

Workbook section	Dashboard
Test data / scope	Click the three-dot icon
Expected result	A dropdown menu should be displayed with all available options
Actual result	A dropdown menu opens with all available options
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-040 — Check the dropdown position

Workbook section	Dashboard
Test data / scope	Open the dropdown
Expected result	Dropdown should be appears below or beside the three-dot menu without overlapping other UI elements
Actual result	Dropdown appears below or beside the three-dot menu without overlapping other UI elements
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-041 — selecting the first menu option

Workbook section	Edit button
Test data / scope	Click the Edit option
Expected result	The Rename Company popup should be displayed
Actual result	The Rename Company popup is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-042 — company name is pre-filled

Workbook section	Edit button
Test data / scope	Open the Rename Company popup
Expected result	The current company name should be displayed in the text field
Actual result	The current company name is displayed in the text field
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-043 — renaming the company

Workbook section	Edit button
Test data / scope	Enter a valid company name and click Save
Expected result	Company name should be updated successfully
Actual result	Company name is updated successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-044 — Save without changes

Workbook section	Edit button
Test data / scope	Click Save without modifying the

	company name
Expected result	No changes should be saved because the company name was not modified
Actual result	No changes is saved because the company name was not modified
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-045 — Cancel button

Workbook section	Edit button
Test data / scope	Open popup → Click Cancel
Expected result	Popup should close without changing the company name
Actual result	Popup is without changing the company name
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-046 — Close (X) button

Workbook section	Edit button
Test data / scope	Open popup → Click X
Expected result	Popup should be close without saving changes
Actual result	Popup is close without saving changes
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-047 — Check empty company name

Workbook section	Edit button
Test data / scope	Remove the company name and click Save
Expected result	Validation message should be displayed
Actual result	Save button will not working

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Hign
Type	Negative

TC-048 — long company name

Workbook section	Edit button
Test data / scope	Enter a name exceeding the maximum allowed length
Expected result	Validation should be displayed or the input should be restricted
Actual result	The system accepts and saves the very long company name without any validation
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Negative

TC-049 — Click Disconnect Company

Workbook section	Delete Button
Test data / scope	Click Disconnect Company
Expected result	It should be directly disconnected
Actual result	It was directly disconnected
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-050 — company status after disconnect

Workbook section	Delete Button
Test data / scope	Disconnect a connected company
Expected result	The company status should be change to Disconnected
Actual result	The company status is change to Disconnected
Recorded status	Passed
Linked bug ID	Not specified in source sheet

Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-051 — Check Last Sync after disconnect

Workbook section	Delete Button
Test data / scope	Disconnect a company
Expected result	The Last Sync field should be display Disconnected
Actual result	The Last Sync field is display Disconnected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-052 — Check Reconnect button is displayed

Workbook section	Delete Button
Test data / scope	NA
Expected result	The Reconnect button should be displayed
Actual result	The Reconnect button is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-053 — Check Reconnect functionality

Workbook section	Delete Button
Test data / scope	Disconnect a connected QuickBooks company and click Reconnect
Expected result	The selected company should reconnect successfully, the status should change to Active/Connected, and all related data should be available
Actual result	The Reconnect functionality does not work correctly
Recorded status	Failed
Linked bug ID	TC-004
Blocked / notes	Not specified in source sheet

Priority	High
Type	Functional

TC-054 — Check Reconnect displays the correct company

Workbook section	Delete Button
Test data / scope	Disconnect a company and click Reconnect
Expected result	The popup should display only the previously disconnected company for reconnection
Actual result	The popup displays different company names instead of the disconnected company
Recorded status	Failed
Linked bug ID	TC-005
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

Workbook section	Delete Button
Test data / scope	Connected account
Expected result	Correct plan (Basic) should be displayed
Actual result	Correct plan (Basic) is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-056 — Connected Companies count

Workbook section	Delete Button
Test data / scope	Connected account
Expected result	Connected companies count should be displayed correctly
Actual result	Connected companies count is correct
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High

Type	Functional
------	------------

TC-057 — Remaining company slots

Workbook section	Delete Button
Test data / scope	Basic plan
Expected result	Remaining slots should be displayed correctly
Actual result	Remaining slots are displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-058 — Change Plan button

Workbook section	Delete Button
Test data / scope	Click Change Plan
Expected result	It should be redirect to Plan upgrade page
Actual result	Plan upgrade page opens
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-059 — Manage Companies button

Workbook section	Delete Button
Test data / scope	Click Manage Companies
Expected result	Company management page should be displayed
Actual result	Pop up should be displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-060 — Check Manage Companies popup

Workbook section	Delete Button
Test data / scope	Click Manage Companies
Expected result	The Switch QuickBooks Company

	popup should be displayed
Actual result	The Switch QuickBooks Company popup opens successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-061 — company search functionality

Workbook section	Delete Button
Test data / scope	Enter a valid company name (e.g., "abc") in the search field
Expected result	The list should display only the companies that match the entered search text
Actual result	The matching company list is displayed based on the entered search text
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

Workbook section	Delete Button
Test data / scope	NA
Expected result	Accrual, Prepaid, and Deferred Rev options should be displayed
Actual result	Accrual, Prepaid, and Deferred Rev options are displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-063 — Check default Journal Type

Workbook section	Delete Button
Test data / scope	NA
Expected result	Accrual should be selected by default
Actual result	Accrual is selected by default

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-064 — switching to Prepaid

Workbook section	Delete Button
Test data / scope	Click Prepaid
Expected result	Prepaid should be selected
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-065 — switching to Deferred Revenue

Workbook section	Delete Button
Test data / scope	Click Deferred Rev
Expected result	Deferred Rev should be selected
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-066 — Refresh Schedule link

Workbook section	Delete Button
Test data / scope	Click Refresh Schedule
Expected result	Schedule should be refreshes successfully
Actual result	Not specified in source sheet
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

TC-067 — Check Setup Master & Input Sheets

Workbook section	Delete Button
Test data / scope	Click Setup Master & Input Sheets
Expected result	Setup process should be starts successfully
Actual result	Setup process starts successfully
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-068 — Pull Master Data from QBO

Workbook section	Delete Button
Test data / scope	Click Pull Master Data from QBO
Expected result	Master data should be imported successfully
Actual result	Master data is imported successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-069 — multiple clicks on Pull Master Data

Workbook section	Delete Button
Test data / scope	Rapidly click Pull Master Data
Expected result	Only one import process starts
Actual result	Only one import process starts
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-070 — Check the internet disconnection during Pull Master Data

Workbook section	Delete Button
Test data / scope	Pull Master Data when the API fails or there is no internet
Expected result	A clear and user-friendly error message should be displayed, explaining why the data import failed and, if possible,

	suggesting the next step
Actual result	The application displays only "Error pulling data.", which does not clearly explain the reason for the failure
Recorded status	Failed
Linked bug ID	TC-006
Blocked / notes	Not specified in source sheet
Priority	High
Type	UI / Functional

TC-071 — Pull Master Data behavior after page refresh

Workbook section	Delete Button
Test data / scope	Click Pull Master Data from QBO and refresh the page while the import is in progress
Expected result	The application should either resume the import or display a clear message that the import was interrupted and needs to be restarted
Actual result	After refreshing the page, the data is not imported
Recorded status	Failed
Linked bug ID	TC-007
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-072 — Check profile menu options

Workbook section	Profile
Test data / scope	Click on profile icon
Expected result	The profile menu should be displayed
Actual result	The profile menu opens successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-073 — Check user information

Workbook section	Profile
Test data / scope	User name: ***** Email :

Expected result	The user information should be displayed correctly
Actual result	The user information is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-074 — Check profile avatar

Workbook section	Profile
Test data / scope	The presence of a profile avatar or image
Expected result	The profile avatar should be displayed correctly
Actual result	The profile avatar is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-075 — Check Manage account option

Workbook section	Manage account
Test data / scope	Click on Manage account
Expected result	Account pop up should be displayed
Actual result	Account pop up is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-076 — Check user information

Workbook section	Manage account
Test data / scope	User name: ***** Email : *****
Expected result	The user information should be displayed correctly
Actual result	The user information is displayed

	correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-077 — Check profile avatar

Workbook section	Manage account
Test data / scope	The presence of a profile avatar or image
Expected result	The profile avatar should be displayed correctly
Actual result	The profile avatar is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-078 — Check Subscription ID

Workbook section	Manage account
Test data / scope	NA
Expected result	Correct Subscription ID should be displayed
Actual result	Correct Subscription ID is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-079 — Check the Plan

Workbook section	Manage account
Test data / scope	NA
Expected result	Correct plan name (e.g., Basic Plan) is displayed
Actual result	Correct plan is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High

Type	Functional
------	------------

TC-080 — Check Status

Workbook section	Manage account
Test data / scope	NA
Expected result	Correct status (e.g., Active) should be displayed
Actual result	Correct status (e.g., Active) is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-081 — Check Member Since

Workbook section	Manage account
Test data / scope	NA
Expected result	The Member Since field should display the correct account creation or subscription start date
Actual result	An incorrect Member Since date is displayed
Recorded status	Failed
Linked bug ID	TC-008
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-082 — Close (X) button

Workbook section	Manage account
Test data / scope	Click X
Expected result	Account popup should be closed
Actual result	Account popup closes successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-083 — Manage account

Workbook section	Manage account
------------------	----------------

Test data / scope	Click on Manage account
Expected result	Another pop should be open or remove the manage account
Actual result	Manage account is not working
Recorded status	Failed
Linked bug ID	TC-009
Blocked / notes	Not specified in source sheet
Priority	Low
Type	Functional / UI

TC-084 — Logout button

Workbook section	Manage account
Test data / scope	Click Logout
Expected result	User should be logged out and redirected to the login page
Actual result	User is logged out and redirected to the login page
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-085 — Check application behavior after logout and login

Workbook section	Manage account
Test data / scope	Login with valid credentials
Expected result	After logging in, the user should be taken to the default landing page. The Manage Account popup should open only when the user clicks Manage Account
Actual result	The Manage Account popup opens automatically immediately after login
Recorded status	Failed
Linked bug ID	TC-010
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-086 — Click on settings

Workbook section	Settings
Test data / scope	Click

Expected result	Settings pop up should be displayed
Actual result	Settings pop up is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-087 — Settings Option

Workbook section	Settings
Test data / scope	Not specified in source sheet
Expected result	Clicking Settings should open the Settings page with the correct options and functionality
Actual result	The Settings option is not working properly and displays unwanted or irrelevant content
Recorded status	Failed
Linked bug ID	TC-011
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional / UI

TC-088 — Click on plan details

Workbook section	Plan Details
Test data / scope	Click
Expected result	Plan details pop up should be displayed
Actual result	Plan details pop up is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-089 — Check plan name

Workbook section	Plan Details
Test data / scope	Open plan details
Expected result	The correct plan name (e.g., Basic Plan, Standard Plan) should be displayed
Actual result	The correct plan name (e.g., Basic Plan) is displayed

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High

TC-092 — Refresh Schedule functionality

Workbook section	Plan Details
Test data / scope	Click Refresh Schedule after connecting a QuickBooks company
Expected result	The schedule should refresh successfully, and the latest schedule data should be displayed
Actual result	Clicking Refresh Schedule does not refresh the schedule or update the data
Recorded status	Failed
Linked bug ID	TC-012

Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-093 — Check login success notification

Workbook section	Notifications
Test data / scope	Login with valid credentials
Expected result	"Login successfully" notification should be displayed
Actual result	"Login successfully" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-094 — Payment success notification

Workbook section	Notifications
Test data / scope	Complete a successful payment
Expected result	"Payment successfully" notification should be displayed
Actual result	"Payment successfully" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-095 — QuickBooks connection success notification

Workbook section	Notifications
Test data / scope	Click Connect to QuickBooks and close the authentication dialog without completing the connection
Expected result	No success notification should be displayed. The company should remain disconnected
Actual result	"QuickBooks connected successfully" notification is displayed even though the authentication was cancelled
Recorded status	Failed

Linked bug ID	TC-013
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-096 — Xero connection success notification

Workbook section	Notifications
Test data / scope	Click Connect to xero and close the authentication dialog without completing the connection
Expected result	No success notification should be displayed. The company should remain disconnected
Actual result	"xero connected successfully" notification is displayed even though the authentication was cancelled
Recorded status	Failed
Linked bug ID	TC-014
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-097 — Data synchronization notification

Workbook section	Notifications
Test data / scope	Connect a company
Expected result	"Data synchronized successfully" notification should be displayed
Actual result	"Data synchronized successfully" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-098 — Master & Input Sheets setup notification

Workbook section	Notifications
Test data / scope	Click Setup Master & Input Sheets
Expected result	"Master and input sheets setup successfully" notification should be displayed after successful setup

Actual result	"Master and input sheets setup successfully" notification is displayed after successful setup
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-099 — Pull Master Data success notification

Workbook section	Notifications
Test data / scope	Pull data successfully
Expected result	"Data pull completed successfully" notification should be displayed
Actual result	"Data pull completed successfully" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-100 — company added notification

Workbook section	Notifications
Test data / scope	Added a new company
Expected result	"Company added successfully" notification should be displayed
Actual result	"Company added successfully" notification is displayed.
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-101 — Data refresh notification

Workbook section	Notifications
Test data / scope	Refresh data
Expected result	"Data refreshed successfully" notification should be displayed
Actual result	"Data refreshed successfully" notification is displayed

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-102 — QuickBooks session expired notification

Workbook section	Notifications
Test data / scope	Expire QuickBooks session
Expected result	"QuickBooks session expired" notification should be displayed
Actual result	"QuickBooks session expired" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-103 — Xero session expired notification

Workbook section	Notifications
Test data / scope	Expire Xero session
Expected result	"Xero session expired" notification should be displayed
Actual result	"Xero session expired" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Critical
Type	Functional

TC-104 — Active company switched notification

Workbook section	Notifications
Test data / scope	Switch active company
Expected result	"Active company switched successfully" notification should be displayed
Actual result	"Active company switched successfully" notification is displayed
Recorded status	Passed

Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-105 — setup prerequisite notification

Workbook section	Notifications
Test data / scope	Pull data without setting up Master & Input Sheets
Expected result	"Please set up master sheet and pull data first" notification should be displayed
Actual result	"Please set up master sheet and pull data first" notification is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Validation

TC-106 — notification visibility

Workbook section	Notifications
Test data / scope	NA
Expected result	Notification should be fully visible
Actual result	Notification is fully visible
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	UI

TC-107 — login success notification is displayed only once

Workbook section	Notifications
Test data / scope	Log in with valid credentials
Expected result	The "Logged in successfully" notification should be displayed only once after a successful login
Actual result	The "Login successfully" notification is displayed four times for a single successful login
Recorded status	Failed
Linked bug ID	TC-015

Blocked / notes	Not specified in source sheet
Priority	High
Type	UI/Functional

TC-108 — Connect Xero button

Workbook section	Xero
Test data / scope	Click Connect Xero
Expected result	Login page should be displayed
Actual result	Login page is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	critical
Type	Functional

TC-109 — Check login

Workbook section	Xero
Test data / scope	Enter valid Xero credentials
Expected result	MFA page should be displayed
Actual result	MFA page is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-110 — User Consent page opens

Workbook section	Xero
Test data / scope	Complete Xero login
Expected result	Xero User Consent page should be displayed successfully
Actual result	Xero User Consent page is displayed successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-111 — Click on continue with two organisations

Workbook section	Xero
Test data / scope	Click continue with 2 organisations

Expected result	Select your company page should be displayed
Actual result	Select your company page is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-112 — Select one company and connect selected companies

Workbook section	Xero
Test data / scope	Select 1 company
Expected result	Xero dashboard should be displayed
Actual result	Xero dashboard is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-113 — Xero company is displayed after successful connection

Workbook section	Xero
Test data / scope	Connect xero account
Expected result	Connected company should be displayed with correct name and status
Actual result	Connected company is displayed with correct name and status
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-114 — Current Plan

Workbook section	Xero
Test data / scope	Basic plan , Standard , Pro
Expected result	Correct plan should be displayed
Actual result	Correct plan is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet

Priority	Medium
Type	UI

TC-115 — Check connected companies count

Workbook section	Xero
Test data / scope	Count
Expected result	Count should be displayed correctly
Actual result	Count is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Not specified in source sheet

TC-116 — Remaining Companies count

Workbook section	Xero
Test data / scope	Basic plan , Standard , Pro
Expected result	Remaining count should be displayed correctly
Actual result	Remaining count is displayed correctly
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional / UI

TC-117 — Check Staus

Workbook section	Xero
Test data / scope	Connected company
Expected result	Status shows Active
Actual result	Status shows Active
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-118 — Add Another Company

Workbook section	Xero
Test data / scope	Click Add Another Company
Expected result	Xero OAuth page should be displayed
Actual result	Xero OAuth page opens

Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-119 — Connection Limit

Workbook section	Xero
Test data / scope	Basic Plan with one connected company
Expected result	Connection limit message should be displayed
Actual result	Connection limit message is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-120 — Check Disconnect

Workbook section	Xero
Test data / scope	Disconnect connected company
Expected result	Company status changes to Disconnected
Actual result	Company status changes to Disconnected
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional / UI

TC-121 — Reconnect only reconnects the previously disconnected company

Workbook section	Xero
Test data / scope	Not specified in source sheet
Expected result	After clicking Reconnect, only the previously disconnected company should be available for reconnection
Actual result	A different company (ERP2) can be selected and is connected through the Reconnect flow

Recorded status	Failed
Linked bug ID	TC-016
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-122 — large Chart of Accounts import with batch processing

Workbook section	Xero
Test data / scope	Connect a Xero account containing 500+ Chart of Accounts records and click Pull Master Data from Xero
Expected result	The application should import the Chart of Accounts successfully by processing the data in smaller batches using context.sync(). A progress indicator should be displayed while the import is in progress
Actual result	The application attempts to import all account records in a single request. The task pane becomes temporarily unresponsive
Recorded status	Failed
Linked bug ID	TC-017
Blocked / notes	Not specified in source sheet
Priority	Low
Type	Functional

TC-123 — Edit Company

Workbook section	Xero
Test data / scope	Rename connected company
Expected result	Updated name should be saved
Actual result	Updated name is saved
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-124 — Cancel Rename

Workbook section	Xero
Test data / scope	Click Cancel
Expected result	Changes should be discarded

Actual result	Changes are discarded
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-125 — Search Company

Workbook section	Xero
Test data / scope	Search company name
Expected result	Matching companies should be displayed
Actual result	Matching companies are displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional / UI

TC-126 — Search No Result

Workbook section	Xero
Test data / scope	Search invalid company name
Expected result	No matching company found
Actual result	No matching company found
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Medium
Type	Functional

TC-127 — Setup Master & Input Sheets

Workbook section	Xero
Test data / scope	Click Setup
Expected result	Sheets should be created successfully
Actual result	Sheets is created successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-128 — Setup Button multiple clicks

Workbook section	Xero
Test data / scope	click multiple times
Expected result	Only one setup request executes
Actual result	Only one setup request executes
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-129 — Pull Master Data

Workbook section	Xero
Test data / scope	Click pull master data
Expected result	Master data should be imported
Actual result	Master data is imported
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-130 — Pull Master Data without setup

Workbook section	Xero
Test data / scope	Pull before setup
Expected result	Proper validation message should be displayed
Actual result	Proper validation message is displayed
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-131 — Pull Master Data after refresh

Workbook section	Xero
Test data / scope	Refresh while import is running
Expected result	Import resumes or appropriate message should be displayed
Actual result	Import resumes or appropriate message is displayed
Recorded status	Passed

Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-132 — Refresh Schedule

Workbook section	Xero
Test data / scope	Click Refresh Schedule
Expected result	Schedule refreshes successfully
Actual result	Schedule refreshes successfully
Recorded status	Passed
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	High
Type	Functional

TC-133 — Success Notification

Workbook section	Xero
Test data / scope	Successful connection
Expected result	Notification should be displayed once
Actual result	Notification is displayed once
Recorded status	Not specified in source sheet
Linked bug ID	Not specified in source sheet
Blocked / notes	Not specified in source sheet
Priority	Not specified in source sheet
Type	Not specified in source sheet

7. Defect Register

The source BUG SHEET contains 27 populated issue rows. Entries are reproduced below, including the original identifiers and recorded statuses. Rows without resolution information remain explicitly marked as unspecified.

TC-011 — Functionality

Title	Functionality
Steps to reproduce	1. Open the FinAccrual Add-in. 2. Navigate to the Journal Type section. 3. Click Accrual
Date found	07 August 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet

Description of data issue	Expected: Accrual option should be available and open the Accrual screen. Actual: Accrual functionality is not available after clicking the option.
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-012 — Functionality

Title	Functionality
Steps to reproduce	Not specified in source sheet
Date found	Not specified in source sheet
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Not specified in source sheet
Root cause / resolution details	Not specified in source sheet
Final status	Not specified in source sheet

TC-013 — Functionality

Title	Functionality
Steps to reproduce	Not specified in source sheet
Date found	Not specified in source sheet
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Not specified in source sheet
Root cause / resolution details	Not specified in source sheet
Final status	Not specified in source sheet

TC-014 — Functionality

Title	Functionality
Steps to reproduce	Not specified in source sheet
Date found	Not specified in source sheet
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Not specified in source sheet
Root cause / resolution details	Not specified in source sheet
Final status	Not specified in source sheet

TC-047 — Not specified in source sheet

Title	Not specified in source sheet
Steps to reproduce	1. Open the FinAccrual Add-in. 2. Connect and log in successfully. 3. Click Disconnect.

	4. Click Connect again
Date found	07 August 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Expected Result: After clicking Disconnect, the current user session should be cleared. When the user clicks Connect again, the login page should be displayed, requiring the user to authenticate before reconnecting. Actual Result: After clicking Disconnect and then Connect, the application reconnects directly without displaying the login page
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-048 — Login Page Is Not Displayed After Reconnecting to Xero

Title	Login Page Is Not Displayed After Reconnecting to Xero
Steps to reproduce	1. Open the FinAccrual Add-in. 2. Connect to Xero and log in successfully. 3. Click Disconnect. 4. Click Connect Xero again
Date found	07 August 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Expected Result: After disconnecting, clicking Connect Xero should redirect the user to the Xero Login page Actual Result: After disconnecting, clicking Connect Xero opens the Xero User Consent (Authorization) page directly instead of displaying the Login page
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-049 — Pull Master Data shows QuickBooks Data After Automatic Disconnection

Title	Pull Master Data shows QuickBooks Data After Automatic Disconnection
Steps to reproduce	1. Connect to QuickBooks successfully. 2. Do not manually disconnect QuickBooks. 3. Change the provider and connect to Xero. 4. Verify that QuickBooks is automatically disconnected. 5. Click Pull Master Data. 6. Observe the result
Date found	07 August 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Expected Result: The pull data should not displayed Actual Result: Even after QuickBooks is automatically disconnected, still shows QuickBooks data
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

30-7-26 — Not specified in source sheet

Title	Not specified in source sheet
Steps to reproduce	Not specified in source sheet
Date found	Not specified in source sheet
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Not specified in source sheet
Root cause / resolution details	Not specified in source sheet
Final status	Not specified in source sheet

TC-001 — Application data is displayed only after manual refresh

Title	Application data is displayed only after manual refresh
Steps to reproduce	1. Launch the application. 2. Verify whether data is loaded automatically. 3. Manually refresh the application. 4. Observe that the data is displayed

	only after refresh.
Date found	30-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The application does not fetch and display data during the initial launch. Data is loaded only after the user manually refreshes the application
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-002 — OAuth authentication window opens behind the application

Title	OAuth authentication window opens behind the application
Steps to reproduce	1. Launch the application. 2. Click Continue with Google (or Continue with Microsoft). 3. Observe where the authentication window opens.
Date found	30-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The OAuth authentication window opens behind the current application instead of appearing in the foreground. Users may think the button is not working because the login window is hidden behind the app
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-003 — Last Sync information is displayed inconsistently

Title	Last Sync information is displayed inconsistently
Steps to reproduce	1. Log in to the FinAccrual Add-in. 2. Connect a QuickBooks company. 3. Perform a sync operation. 4. Observe the Last Sync value. 5. Repeat the sync multiple times
Date found	30-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet

Description of data issue	The Last Sync time is displayed inconsistently. Sometimes it shows the latest sync time
Root cause / resolution details	Not specified in source sheet
Final status	Completed (Directly auto refresh token added)

TC-004 — Reconnect functionality is not working properly

Title	Reconnect functionality is not working properly
Steps to reproduce	1. Connect a QuickBooks company. 2. Disconnect the company. 3. Click the Reconnect button. 4. Complete the reconnection flow (if prompted). 5. Observe the application behavior
Date found	30-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The Reconnect functionality does not work as expected. After clicking Reconnect, the company is not reconnected correctly or the application behaves unexpectedly
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-005 — Reconnect displays incorrect company names

Title	Reconnect displays incorrect company names
Steps to reproduce	1. Connect a QuickBooks company. 2. Disconnect the connected company. 3. Click Reconnect. 4. Observe the companies listed in the Switch QuickBooks Company popup
Date found	30-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The Reconnect popup displays different company names instead of the previously disconnected company. The popup should display only the correct

	disconnected company for reconnection
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-006 — Error message displayed when Pull Master Data fails

Title	Error message displayed when Pull Master Data fails
Steps to reproduce	1.Connect to QuickBooks. 2.Click Pull Master Data from QBO. 3.Simulate an API failure or disconnect the internet. 4.Observe the error message
Date found	31-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	When the Pull Master Data operation fails, the application displays only "Error pulling data." This message does not provide sufficient information about the reason for the failure or the corrective action required
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-007 — Pull Master Data process is interrupted after page refresh

Title	Pull Master Data process is interrupted after page refresh
Steps to reproduce	1. Connect a QuickBooks company. 2. Click Pull Master Data from QBO. 3. Refresh the page while the import is in progress. 4. Observe the import status
Date found	31-7-26
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Refreshing the page while Pull Master Data is running interrupts the import process. After the refresh, no data is imported, and the application does not notify the user that the operation was interrupted
Root cause / resolution details	Not specified in source sheet

Final status	Completed
---------------------	-----------

TC-008 — Incorrect "Member Since" date displayed in the Account page

Title	Incorrect "Member Since" date displayed in the Account page
Steps to reproduce	1. Log in to the FinAccrual Add-in. 2. Click the profile icon. 3. Select Manage Account. 4. Compare the Member Since date with the user's actual account creation or subscription date.
Date found	08 April 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The Member Since field displays an incorrect date that does not match the user's actual account creation or subscription date
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-009 — Manage Account option is not functioning

Title	Manage Account option is not functioning
Steps to reproduce	1. Log in to the FinAccrual Excel Add-in. 2. Click the profile icon. 3. Click Manage Account.
Date found	08 April 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Clicking the Manage Account option does not perform any action. Either the Manage Account popup/page should open, or if the feature is not implemented, the option should be removed or disabled to avoid confusing users
Root cause / resolution details	Root Cause: Under investigation. The Manage Account action may not be implemented or the click event is not triggering the intended functionality.

	Resolution: Implement the Manage Account feature or remove/disable the option until it is supported
Final status	PENDING

TC-010 — Manage Account popup opens automatically after login

Title	Manage Account popup opens automatically after login
Steps to reproduce	1. Log in to the application. 2. Click Logout. 3. Log in again with valid credentials. 4. Observe the screen displayed after login
Date found	08 April 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	After logging out and logging back in, the application automatically opens the Manage Account popup instead of navigating to the default landing page
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-011 — Settings option is not functioning and displays unwanted content

Title	Settings option is not functioning and displays unwanted content
Steps to reproduce	1. Log in to the FinAccrual application. 2. Click the profile icon. 3. Click Settings. 4. Observe the Settings page or popup
Date found	08 April 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The Settings option is not working as expected. It either does not perform the intended action or displays unwanted/irrelevant content. The Settings page should contain only the intended settings and function correctly
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-012 — Refresh Schedule functionality is not working

Title	Refresh Schedule functionality is not working
Steps to reproduce	1. Connect a QuickBooks company. 2. Navigate to the main dashboard. 3. Click Refresh Schedule. 4. Observe the application behavior
Date found	08 April 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Clicking the Refresh Schedule option does not refresh the schedule or update the displayed data. The feature is unresponsive or does not perform the expected action
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-013 — QuickBooks connection success notification is displayed even when authentication is cancelled

Title	QuickBooks connection success notification is displayed even when authentication is cancelled
Steps to reproduce	1. Click Connect to QuickBooks 2. When the QuickBooks authentication dialog opens, close or cancel it without completing the authorization 3. Observe the notification displayed in the application
Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The application displays the "QuickBooks connected successfully" notification even though the user cancelled the authentication process. No successful connection was established
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-014 — Xero Connection Success Notification Displayed After Authentication Is Cancelled

Title	Xero Connection Success Notification Displayed After Authentication Is Cancelled
Steps to reproduce	1. Click Connect Xero. 2. Xero login window opens. 3. Close the authentication window without completing login. 4. Observe the notification
Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The application displays "Xero connected successfully" even though the Xero authentication process was cancelled and no connection was established
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-015 — Duplicate Login Success Notifications Displayed After Single Login

Title	Duplicate Login Success Notifications Displayed After Single Login
Steps to reproduce	1. Launch the application. 2. Log in using valid credentials. 3. Observe the notifications displayed after login
Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The "Login successfully" notification is displayed multiple times (e.g., four times) for a single successful login instead of appearing only once
Root cause / resolution details	Not specified in source sheet
Final status	Completed

Xero — Not specified in source sheet

Title	Not specified in source sheet
Steps to reproduce	Not specified in source sheet

Date found	Not specified in source sheet
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	Not specified in source sheet
Root cause / resolution details	Not specified in source sheet
Final status	Not specified in source sheet

TC-015 — Xero connection success notification is displayed even when authentication is cancelled

Title	Xero connection success notification is displayed even when authentication is cancelled
Steps to reproduce	1. Click Connect to Xero 2. When the Xero authentication dialog opens, close or cancel it without completing the authorization 3. Observe the notification displayed in the application
Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The application displays the "Xero connected successfully" notification even though the user cancelled the authentication process. No successful connection was established
Root cause / resolution details	Not specified in source sheet
Final status	Completed

TC-016 — Reconnect allows connecting a different company instead of reconnecting the previously disconnected company

Title	Reconnect allows connecting a different company instead of reconnecting the previously disconnected company
Steps to reproduce	1. Connect ERP1. 2. Click Reconnect. 3. When the company list appears, select ERP2 instead of ERP1. 4. Complete the authentication process. 5. Observe the connected companies list

Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	The Reconnect flow allows users to select and connect a different company (ERP2) instead of reconnecting the previously disconnected company (ERP1). This results in an incorrect company being connected through the Reconnect process
Root cause / resolution details	Not specified in source sheet
Final status	PENDING

TC-017 — Excel Add-in fails to import large Xero Chart of Accounts due to request payload limit

Title	Excel Add-in fails to import large Xero Chart of Accounts due to request payload limit
Steps to reproduce	1. Connect a Xero organization with a large Chart of Accounts (e.g., 500+ accounts). 2. Open the Excel Add-in. 3. Click Import Accounts to Worksheet. 4. Wait for the import process to complete. 5. Observe the task pane and Excel worksheet
Date found	08 May 2026
Date resolved	Not specified in source sheet
Turnaround (days)	Not specified in source sheet
Description of data issue	When importing a large Chart of Accounts from Xero, the Excel Add-in sends all records to Excel in a single request. This exceeds the Office JavaScript API request size limit, causing the import to fail and resulting in poor user experience
Root cause / resolution details	Not specified in source sheet
Final status	Completed

8. Observations and Follow-up Considerations

The following are documentation and QA follow-up considerations based on the workbook structure; they are not additional defects or claims about the current application:

- Complete blank execution fields (actual result, status, priority, type, and notes) when tests are run, so test coverage and progress can be measured consistently.
- Ensure each failed test is linked to a corresponding defect ID and that defect records include a clear owner, root cause, resolution details, retest result, and closure date where applicable.
- Standardize status values (for example, Pass, Fail, Pending) and priority labels (for example, Critical, High, Medium, Low) to simplify reporting.
- Review test cases where the recorded actual result does not clearly state whether the expected behavior was met.
- For defects marked completed or resolved, retain evidence of retesting before closure if that is part of the team's QA process.

9. Source Data Notes

This document is based solely on the uploaded workbook. Original wording is retained where practical, with line breaks and layout adjusted for readability. Obvious source-sheet inconsistencies, incomplete entries, and blank fields have not been silently rewritten as confirmed facts. Date values are formatted for readability.
